#### MISSOURI PACIFIC STOCK ACTIVE IN WALL STREET.

SHARES CENTER OF INTER EST WITH ST. PAUL.

Advances Made in Face of Depression Following Study of the Crop Report.

New York, June 11 .- There was a further expansion in dealings on the Stock Exchange to-day, which was generally attributed to the resumption of activity by the newly returned leaders of the Western group. This activity centered in St. Paul. There was, besides, an active market in Missouri Racific, which had no apparent connection with the St. Paul movement so far as the identity of the brokers employed would reveal it. Those two stocks ran a pretty close race for the leadership of the market in point of activity with Missouri Pacific getting rather the best of it, both in the volume of dealings and in the extent of the gain. Just at the close the stock moved up more than 2 points over last night. St. Paul's extreme rise was 1% and was not rully held. Between them the two stocks made up about one-fourth of the aggregate dealings of the day.

Other Stocks Act in Sympathy. nection with the St. Paul movement so

Other Stocks Act in Sympathy. There were considerable gains in other stocks, but these seemed to be more or less in sympathy, and there was at the same time some selling to take advantage of this sympathetic strength. There was no evisympathetic strength. There was no evidence that any considerable outside following was attracted to the movement. The advance was made in the face of a feeling of disappointment over the monthly crop bulletin issued last night by the Agricultural Department. The bulletin showed none of the hoped-for improvements in the condition of winter wheat, upon which the stock market has been acting, and the effect of the high average condition of spring wheat was more than offset by the large decrease in acreage, causing a large failing off in the indicated spring wheat crop from that of last year. With continued tack of rain in some portons of the cotton bent, the influence of the crop news could not be called beneficial upon stock values. The dominant importance of the corn crop this year was thus emphasized and it is considered likely that this importance will gain force from this time forward.

Hope for Larger Dividends.

Hope for Larger Dividends.

The argument was heard that an increase in the dividend on St. Paul is likely from the snalogy of the increase in Chicago and Northwestern dividend. The strength of Missouri Pacific caused renewal of old rupors that the long-expected plan for the consolidation of the Gould railroad interests into one corporation was being perfected. No warrant for either of these reports could be secured in any quarter of authority. The coalers were comparatively neglected, but were firm owing to the current assertion that the striking miners were likely to yield the contest soon. Nothing more was heard of plans for a compromise of the contest. Call money was easy and in abundant supply, notwithstanding some digreased demand for stock market purposes, but the rates for time loans are firm is held. Rather than make concessions to be place money on time bankers prefer to keep their funds in call loans, where they are easily accessible for any future increase in the rates for time loans. The approach of the semiannual settlement period induces a cautious policy in the money market. The sex market closed dull and irregular.

Prices of bonds advanced. Burlington joint is were in demand on the reported extension of the underwriting syndicate. Total sales per value 8.990,000. United States bonds were all unchanged on the last call. Hope for Larger Dividends.
